PRODUCT RANGE

Our range of products is specifically designed to offer you a completely customizable fencing solution, from welded mesh panels to a selection of spikes and posts. This affords you the opportunity to build the perfect security barrier specific to your lifestyle requirements. In addition to this, we have four different coating options from which to choose which completes the overall look and adds the desired finishing touches to your fencing solution.

High Security Fence

The compact wire apertures on this product provide a maximum security solution to properties situated within high risk areas. Although the design is compact, these fences maintain their see-through appearance making them ideal for securing the perimeters of industrial properties, office parks, shopping malls and estates.

Suggested Panels:

- 577
- 530

Perimeter Fence

Without compromising on strength or reliability, the wire apertures on these fences are larger than those on most other such product ranges, as their see-through feature is designed to secure the perimeter of recreational facilities, sports fields and schools.

Suggested Panels:

- 308
- 258

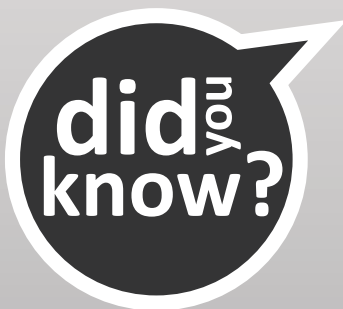

Economical Fence

This range serves budget conscious customers with a variety of security solutions that provide maximum protection at an affordable price: Used for commercial and industrial perimeters, it is also ideal for properties situated within secure holdings, internal fences for residential estates and agricultural applications.

Suggested Panels:

- 254
- 190

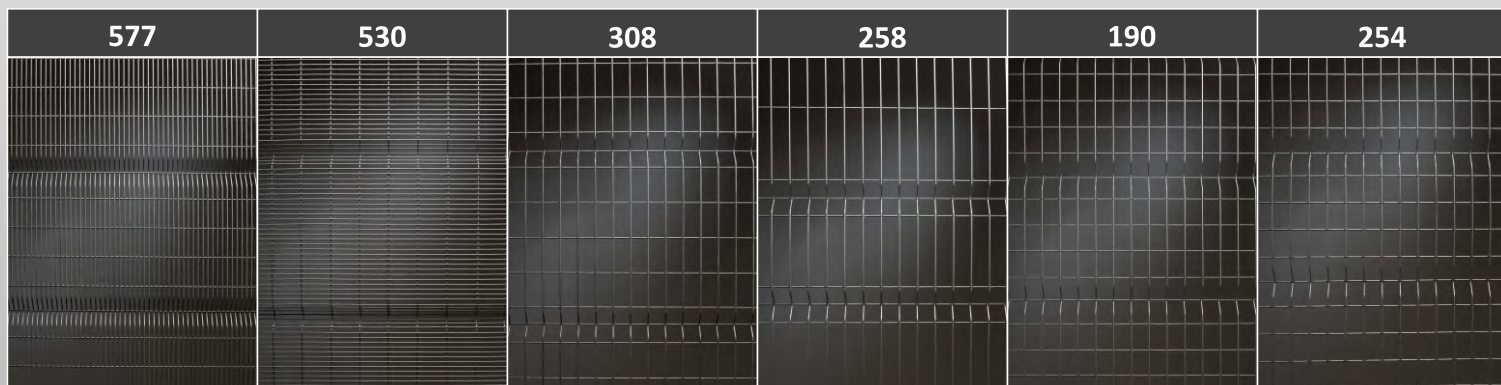

All our products are manufactured locally, making us proudly South African!

Product Features:

- Multiple "V" bends provide increased rigidity
- Anti-tamper fixator solution (Maximum wire contact)
- Highly transparent see-through panels.

Rugged secure fencing solutions that enhance the value of property assets. Aesthetically pleasing, offers maximum protection and can be fitted as a complete system or retrofitted to enhance existing perimeter fences.

COATINGS

Our range of products is specifically designed to offer you a completely customizable fencing solution, from welded mesh panels to a selection of spikes and posts. This affords you the opportunity to build the perfect security barrier specific to your lifestyle requirements. In addition to this, we have four different coating options from which to choose which completes the overall look and adds the desired finishing touches to your fencing solution.

Galvanized

Cost effective, yet elegant, solution for inland applications. All welded mesh panels are pre-galvanized.

Polyester Powder Coat

Exterior, UV resistant Polyester Powder Coating available as a final finish to all pre-galvanized wire fences and components.

Plascoat / PVC

Plascoat/PVC final coat on pre-galvanized wire fence panels for Coastal applications.

IPE & Square Posts

Our two-post designs allow customers and/or architects to tailor their fence's appearance to their desired style and/or architectural requirements, without altering the technical specifications.

Multi and Maxi Spikes

We also offer a very unique spiking mechanism which can be secured onto any of our fences for added security.

We have developed a range of welded mesh panel systems to provide barrier solutions for a wide and varied range of applications including domestic, schools, roads, sports facilities and security installations.

Features:

- Multiple “V” bends provide increased rigidity
- Choice of plain, electric wire or top multi-spike
- Unique clamping system ensures maximum wire contact
- Galvanized or coated finish
- Anti-tamper fixator solution
- Wires pretensioned prior to welding
- 700mPa high tensile wire
- Vertical wire arrangement
- Highly transparent.
