STAFIX DONATES 50 CAMERAS TO TIMBAVATI

To help in the fight against rhino poaching, Stafix Electric Fence Centre donated 50 cameras to Timbavati Game Reserve. These eyes in the sky enable rangers to verify fence alarms and react.

Vernard with warden, Edwin Pierce

WELCOME TO 2020

A bit late but better late than never. We wish all our customers and distributors a happy New Year and, despite all the pessimists' predictions of a difficult year, a very prosperous New Decade.

NEW STAFIX TRAINING CENTRE OPENED

See page 2

2019 WRAP UP

2019 proved to be a very busy year, so busy in fact that, regrettably, only one Ndlovu Trumpeter rolled off the printing press.

So, to sum up 2019, here are the highlights of the year:

- We opened our new stand-alone Stafix Training Centre; registered designation *Ndlovu College*
- JVA launched their new highly sophisticated Jumbo Range of high-powered battery energizers
- Stafix Electric Fence and Security centres were granted a distributorship for the Dahua CCTV range
- A joint venture outlet in the USA was established
- Details of these developments and others are contained in this newsletter.

KNOWLEDGE IS POWER

We all know that *Knowledge is Power* and that JVA Energizers can certainly deliver that *Power* – power that can stop anything from a Chihuahua to an Elephant. However, does one have the *Knowledge* of how best to utilize this power?

It was with this in mind that Shaun Williamson (MD), set about establishing a state-of-the-art, user friendly and practical training facility that will enable installers to really experience the joy of learning how best to utilize and install the ranges of security products marketed by the Stafix Security Centres.

The Stafix Training Centre, officially registered as *Ndlovu College*, is located near to Oliver Tambo airport and next door to two reasonably priced hotels making the venue ideal for out-of-town visitors attending training.

The centre has a spacious and fully equipped lecture room, a model control room, rooms fitted out with practical training decks for CCTV training and COC examinations, a large showroom displaying ranges of related products and a spacious catering lounge. The COC course has been approved by the EWSETA and is registered with the Department of Labour for their *Certificate of Competence*.

JVA JUMBO RANGE

The new JVA JUMBO range of energizers are the most powerful and feature rich electric fence energizers JVA has manufactured to date. In fact the JUMBO series are the world's most powerful, purely battery powered, energizers. The JMB1 is a single-zone monitored energizer, the JMB2 is a two-zone monitored energizer and the JMB50 is a unit capable of partitioning a fence from 1–50 sectors. This continues JVA's drive for technical superiority in the area of monitored electric fencing and IP energizers.

FEATURES

- World's largest battery energizer (46 Joules stored)
- One- or two-zone units and one capable of monitoring 50 sectors
- Can report the position of the fault as a percentage of the overall fence length
- Short sectors can be defined accurately using JVA sector dividers
- ELV (Extra Low Voltage) open circuit detection
- Can run off 12V, 24V or 220V
- Ideal for solar application
- Can be linked to Perimeter Patrol Software or Cloud Router App
- Built-in Wi-Fi for easy programming
- Secure 24/7/365 operation

While the JVA JMB series was specifically designed for large game parks, it is eminently suited for any large rural permanent electric fencing projects.

ROBOTEXT

We are pleased to announce the arrival of the RoboText GSM unit, designed for Roboguard systems. We have weekly requests from customers who require an easy-to-setup GSM for their Roboguard systems; especially a system that can supply detailed information regarding the status of a Roboguard system.

FEATURES

- When a Roboguard system is *Armed* or *Disarmed* an SMS will be received with a Status of the system
- When a Roboguard zone is triggered, you will receive an SMS stating which Zone was triggered
- The RoboText can arm and disarm your Roboguard system via a Roboguard universal transmitter
- You can rename your zones (*max 8 characters*)
- You have an extra relay that you can either switch On, Off or pulse (*for a gate trigger, or armed response radio*)
- The LED-output will indicate the armed status
- It is supplied with a pre-wired alarm cord (*plug-and-play*) and a small Whip antenna

ASKARI BURSTS BACK ONTO THE SCENE

Having experienced a bit of a shaky start, Askari Beams are back on the scene in force. With over 1000 beams already having been sold in the crucial Beta Test phase, all wrinkles have now been ironed out and the revamped beams are set to make an imprint on the market.

Askari has special ultra violet proof patented lenses (poly IR6) which are guaranteed for 10 years of unimpaired function.

Most outdoor beams use ordinary Fresnel lenses which deteriorate rapidly when exposed to sunlight, thus requiring about four units to achieve the equivalent life span of one Askari.

NEW REINFORCED VALUE REEL

This new, extra strong Nylon Reel HD spool is twice the weight of the old reel.

FEATURES

- Has a locking mechanism that eliminates wobble
- Six locking points on the reel for added strength
- Fitted with Tension Spring to retain poliwire tension

Red knob on handle denotes Heavy Duty model

Carry bags available

PORTABLE PADDOCK KIT

Quality Portable Paddock Kit

A robust easy to set up 6m x 6m Paddock.

The Kit consists of the following:

- 1 x Value Reel with 25m 40mm Horse Tape
- 1 x Reel Stand with Gate Activator
- 1 x Gate Handle and Buckle
- 3 x Corner Posts
- 4 x Robust Post Mounting Pegs
- 4 x 1.5m Pig Tail Tread-Ins
- 4 x Guy Ropes
- 4 x Tent Pegs
- 1 x Carry Bag

Walk Test Mode

Setting up the beam array for optimal performance:

After mounting your Roboguard make sure it is detecting intruders. If its range seems very short, you will need to adjust the beams to make them level with the ground and parallel to each other. *Walk Test* allows you to hear the beams as they detect, and make these adjustments.

Camouflaged guard

1. Remove the battery cover from the Roboguard, or press and release the tamper switch; the on-board buzzer will activate for about 20 minutes before going silent again.
2. Ensure that the securing screw of both top and bottom sensor boxes is over the middle line of the adjustment slot.
3. The Roboguard will now buzz once for every time the bottom sensor detects, and twice for every time the top sensor detects. You should hear three 'buzzes' which means that both sensors are detecting.
4. Walk across the path cutting the beams from left to right and back again, and keep increasing the distance between you and the Roboguard. Don't walk directly towards the guard.
5. If only 1 'buzz' is heard, only the bottom sensor is detecting you and the top beams are most probably set too high.
6. Top Sensor: Loosen the retaining screw. Sliding the box up will lower the beam, pulling it down will raise the beam (seesaw effect). A 1mm adjustment will move the beam 1 metre up or down over 10 metres, so make only slight adjustments until you hear the beam strike you. Tighten the retaining screw.
7. Bottom sensor: Follow the same instructions: if only the top sensor is detecting you, this time moving the bottom sensor box.
8. Work slowly and methodically and check every beam in the pattern. Pause for 2 seconds between 'buzzes' to catch the next beam.
9. Note: Move slowly; if only 1 sensor is detecting you, the Roboguard takes longer to react: it is waiting for the other sensor to detect.

STAFIX ELECTRIC FENCE CENTRES GRANTED DAHUA DISTRIBUTORSHIP

Stafix Electric Fence and Security Centres are proud to announce that we have been granted a Dahua CCTV distributorship. Zhejiang Dahua Technology Co. Ltd, (Dahua Technology), is undisputedly a world leader in the field of video-centric smart IoT solutions and service provision. With more than 16,000 employees, of which 50% are engaged in R&D, Dahua Technology has its solutions, products and services applied in 180 countries.

Dahua Technology has been ranked 2nd for five years in a row in the global CCTV and Video surveillance equipment market. Dahua is committed to the mission of, *Enabling a safer society and smarter living.*

Chinese visitors seen in the Model Control Room

DAHUA VICE PRESIDENTIAL VISIT

Having just returned from a visit to the Dahua headquarters in China, Shaun Williamson (MD), Brian Wynberger and D. J. Wills were able to reciprocate when called on by Jason Zhao, vice president of Dahua. Accompanied by Vito Zhao, Robbin Shen, John Zhao, and Jet Zhu, Dahua's local representatives, the party was shown around Ndlovu's new training centre at Harmelia.

Dahua catalogues are available

HYYP HUB

FEATURES

- Remote alarm panel control with real time notifications
- Secure multiple site management with partition view
- Admin user control
- Change partition and user names
- Notifications
- Bypass zones

TEXAS JOINT VENTURE

2019 saw the establishment of a JVA outlet in Austin, Texas, USA, a joint-venture operation run by Billy Pullen, formally of Elf Rentals and now a Dallas Cowboy supporter. The venture is already making its mark. Seen here in the cap is Billy converting genuine Texas cattle barons to JVA. **Yeeeeeeha!**

They start em young in Texas

OH LITTLE TOWN OF BETHLEHEM

A cosmic event occurred in the little town of Bethlehem - that's Bethlehem in the Free State - when Adriaan Van Rensburg and Tania van der Walt of Stafix Bloemfontein opened a new Stafix outlet. It's first day sales broke all previous records. Veels geluk aan Philip Louw en Tjaart van der Wath.

A star was born

OUT AND ABOUT

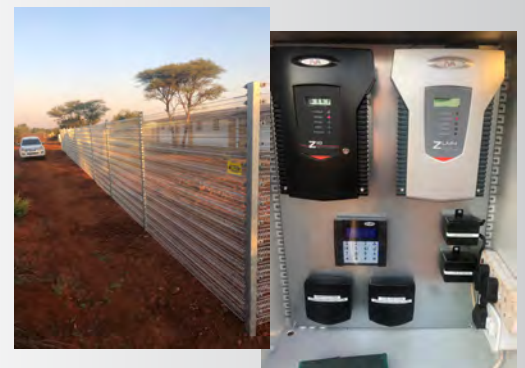

Ellie decided to take a detour into the veld on the road to NAMPO... But after some minor repairs, he was on his way again and arrived safe where he was welcomed with open arms
